

Project Synopsis.

Concept overview

A portfolio Website that should represent about student, it should consist as bio, about me, portfolio- under portfolio there should be proof of work, client testimonials, etc.

Qualification - simply to prove why you should hire me,

Skill sections :- basically to show top work you had done.

.

About me

Display name, the title of what I am, like ui/ux designer, industrialist expert.

Projects:-

This section is for to simple put projects or work which had been done by candidate

+ Client testimonials.

Skill:-

Basically to represent your self, either be bold and creative approach or either with simple and direct approach.

Experience:-

As there's two way of approach with to to make full dedicated para to express yourself or most efficient way is to be short, precise and consise.

As 2nd approach seems better.

Qualification:-

like simply put it your education list to a simply make a point why they should hire you, Why you are the best option, on what basis of qualification you have. Like a graphic designer can't be a software developer.

Award & recognition:-

As it's for someone for, one with higher candidate level, such as number of real basis errors in code you solve that gives a credibility score, and some certificate like winning a hackathon.

Contact.

In the end a sort of icon where to simple put it social media icon with link that'll re-direct to candidate page.

Along with header section consists of contact section.
